Using the CP Plus ezy 4G Camera

3MP Camera for Vivid Video

Designed to represent an enhanced picture quality in 3MP camera so that every detail can be viewed with vivid clarity and a pixilated video feed can be avoided.

Full-Color Night Vision

The Full Color camera captures every detail in vivid, natural tones, even in the darkest hours. Unlike traditional cameras that switch to black-and-white, it delivers clear recognition of faces, clothing, and surroundings round the clock. With true color imaging 24x7, it ensures smarter, more reliable, and more confident security for any environment.

≫ CP PLUS

Motion Tracking

Whenever unexpected motion is detected in the video frame, the camera has been devised to rotate automatically to track the movement of people and record it to investigate later.

Human Body Detection

Designed to provide human detection and intelligent alerts, which means only being alerted only when the need occurs as the camera detects people as opposed to animals, passing vehicles, or other inanimate moving objects.

4G Support

To eliminate the hassle of cables and switches, this camera has been 4G enabled which makes it easier and better to conduct surveillance of any closed space.

Built-in Siren

When the camera detects movements in the video frame, the Built-in siren automatically goes off to keep you notified in real-time to help you stop intruders effectively.

Cloud Recording

Offers secure and encrypted cloud-based video storage, ensuring your recordings are accessible anytime, anywhere, even if the physical camera is tampered with.
